APPENDIX.

JAIPUR STATE.

Table A-1.—Area (in acres) of each district in Jaipur, from 1892-93 to 1895-96 367
Table A-2.—Classification of the area (in acres) of each district in Jaipur, from 1892-93 to 1895-96 . . 368—369
Table A-3.—Area (in acres) under crops in each district in Jaipur, from 1892-93 to 1895-96 . . 370—373
Table A-4.—Live-stock, ploughs, and carts in each district in Jaipur, from 1892-93 to 1895-96 . . 374
Table C.—Incidence of the Land Revenue assessment on area and population in each district of Jaipur in 1894-95 and 1895-96 . . 376—377

Vernacular terms used in the explanatory Memorandum.

Bané (Coorg).—Forest land granted for the service of the holding of rice-fields to which it is allotted, to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.

Bobabaing (Upper Burma)—Non-State land.

Inám (Mysore).—Wholly or partially revenue-free tenure; *minor ináms* are inám lands situated in a village, whether government or inám.

(Madras).—*Whole inám* villages are *entire* villages held on such tenure; *minor ináms* are portions of villages, generally a number of fields held on inám tenure.

Istamrári (Panjab and Ajmere-Merwara).—A tenure which, though the revenue is assigned, is charged with a permanently fixed quit-rent.

Izáfat (Bombay).—A form of service tenure.

Izára (Berar).—Land leased under the waste-land rules on stipulated terms.

Jagir (Berar).—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.

(Ajmere-Merwara).—Land granted revenue-free on condition of military service or as a charitable endowment.

(Coorg).—Lands granted rent-free (1) to individuals on account of services rendered to the State by themselves or their ancestors, and (2) to some religious institutions.

Jamma (Coorg).—A military tenure under which certain Coorgs hold lands on half the ordinary assessment, and in return are liable to be called on to perform certain services, such as escorting treasure and military service if required. These lands cannot be alienated by the holders.

Jodi (Madras).—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths—of the full assessment, minus the Jodi) imposed when the tenures were enfranchised or converted into free-holds.

(Mysore).—A whole inam village paying quit-rent to Government.

Kayamgutta (Mysore).—A whole village granted by the State on fixed money rent.

Khalsa (Bombay).—Government occupancy or ryotwari tenure.

(Central Provinces).—Areas settled on malguzari or thikadari tenure, in contradistinction to zamindari as defined in the note on page v.

(Berar).—Government land paying full revenue to Government.

(Ajmere-Merwara).—Land paying full revenue to Government.

Khatadar (Berar).—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.

Khiraj (Assam).—Land assessed to full revenue.

Khoti (Bombay).—A form of tenure, found chiefly in the Konkan, the holder of which is, in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.

Lakhiraj (Assam).—Revenue-free land.

Malguzari (Central Provinces).—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village.

Malikmakbuza (Central Provinces).—A person owning one or more plots of land separately assessed to revenue in a village, who is not a malguzar, inferior proprietor, or a member of the proprietary body of that village.

Mehwasi (Bombay).—A proprietary tenure assessable to revenue at a lump sum.

Milankhasra (Central Provinces).—An abstract record in which the village area is classified.

Mittas, Palayams (Madras).—Certain classes of permanently-settled estates differing in their origin from zamindaris. Mittas were artificial estates created under Madras Regulation XXV of 1802, while Palayams are the estates of Poligars or old chieftains. Most of the latter have been granted title-deeds of permanent settlement under the Regulation mentioned, but a few have not been settled, though in practice their revenue is treated as fixed.

Muafi (Manpur).—Any kind of land held revenue-free either for a fixed period or in perpetuity, but the term does not ordinarily apply to jagirs.

Narvadari, Bhagdari (Bombay).—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump, and in the latter distributed by rates over fields.

Nazul (North-Western Provinces).—Property escheated or lapsed to the State.
Nisfkhiraj (Assam).—Land liable to pay half the revenue which is ordinarily payable for the term of settlement.
Palampat (Berar).—Land held on payment of a quit-rent, but not necessarily hereditary.
Parapattigar (Coorg).—A revenue officer in charge of sub-district.
Patel (Mysore).—Village headman appointed by Government.
Peshkash (Madras).—The fixed land revenue payable to Government on all permanently-settled estates.
Poramboke (Madras).—Lands reserved for public or village communal purposes.
Pót ináms (Bombay).—Lands sub-alienated in alienated villages.
Potkhrab (Berar).—The unculturable area included in a survey number.
Sarvamanyam (Mysore).—An inám village, wholly revenue free.
Shambogue (Mysore).—A village accountant appointed by Government.
Shrotriem (Madras).—Village held on grant (originally to Brahmins), wholly or partially revenue-free.
Talukdari (Bombay).—A form of proprietary right in force in the northern districts of Bombay.
Thikadari (Central Provinces).—A farmer, a leaseholder, a middleman; one who receives the rents from the cultivators and pays a stipulated sum to the proprietor.
Udhad-jamabandi (Bombay).—A proprietary tenure subject to fixed assessment.
Umbli (Coorg).—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.

Explanatory Memorandum.

In 1866 tabular forms proposed by a Statistical Committee were prescribed by the Government of India for general adoption as appendices to the annual reports on general administration.

In 1884, at the instance of the Secretary of State for India, certain of these forms, which related to agriculture, land, and tenures, were reconsidered and modified, after examination and discussion by a conference of officers of the Agricultural Departments. The modified returns comprised eight tables, which were compiled for the first time for the year 1884-85 and published under the title of 'Returns of Agricultural Statistics of British India.' These tables were prepared and published annually until 1887-88, when a re-arrangement was made of the headings of four statements dealing with area, irrigation, crops, and agricultural stock, though no modification was made in substance.

In 1891 the tables were again subjected to revision and to some extent recast. The revised series of 1891 has, with a few unimportant alterations, been maintained up to the present time, with the exception that table B has been discontinued, other arrangements having been made to secure a record of wholesale prices.

The following schedule compares the three series of 1866, 1884, and 1891:—

1866.	1884.	1891.
IA. 1.—Area cultivated and uncultivated.	A.—Area cultivated and uncultivated. Irrigation.	A.—Total acreage, classification of areas, irrigation, current fallows, and stock.
...		
IIID. 1.—Crops cultivated.	B.—Crops cultivated .	
IIID. 2.—Agricultural stock.	IIID. 2.—Agricultural stock .	
IIIE. 1.—Prices of produce.	IIIE. 1.—Prices of produce .	B.—Prices of produce.
IE. 2.—Surveyed and assessed area.	C.—Surveyed and assessed area.	C.—Incidence of the land revenue on area and population.
IE. 3.—Varieties of tenure held direct from Government.	IE. 3.—Varieties of tenure held direct from Government.	D.—Varieties of tenure held direct from Government.
IE. 4.—Varieties of tenure not held direct from Government.	Discontinued . . .	Discontinued.
IE. 5.—Register of transfers.	IE. 5.—Register of transfers.	E.—Register of transfers of landed property.
IIID. 3.—Rates of rent and produce.	Discontinued . . .	Discontinued.

The notes which follow explain the changes which have been made since 1866 in the tables now published. The general instructions for the compilation of the existing series are given in the General Notes and any peculiarities in the method adopted in each province in filling up the returns are mentioned in the Provincial Notes. Such figures of particular districts as require explanation are dealt with in notes appended to the tables.

The only Native States which furnish returns at present are Mysore, whence they have been received since 1886-87, and Jaipur, whence they have been received since 1892-93.

For the permanently-settled Province of Bengal no figures were available until recently. Such statistics as have been supplied for Bengal were included for the first time in the Returns of 1892-93, but they are not based upon accurate surveys or village papers, and must therefore for the most part be regarded as estimates.

TABLE A.

This table is a combination, in somewhat modified form, of the four tables A, B, Irrigation Form, and III D-2, prescribed by the Government of India in 1884. It is divided into four sections, and was first published in its present form in 1887-88.

TABLE A-I.

This section gives the total area of each district, the areas for which statistics are and are not available being distinguished.

The corresponding tables of the earlier series are I A-1 of 1866 and A of 1884. The headings differ as set out below :—

1866 I A. 1.	1884 A.	1891 A.-1.
Total area in square miles	Area shown by the Survey Department in acres.	Area according to Professional Survey in acres.
	Deduct—	Deduct—
	(*a*) Feudatory and Tributary States.	(*a*) Feudatory and Tributary States.
	(*b*) Area for which returns are otherwise not available.	(*b*) Area for which no returns exist.
	Net area dealt with in this return.	Net area by Professional Survey.
		*Corresponding area in village papers.

GENERAL NOTES.

Column 2.—The Professional Survey is that carried out by the Survey of India Department in Northern India, and by the corresponding Departments in the Southern Presidencies. The provincial areas in this column exclude Native States in direct political relations with the Government of India in the Foreign Department, but in most instances include Feudatory or Tributary States politically controlled by Local Governments.

Column 3.—Shews the area of any Feudatory or Tributary States included in column 1.

Column 4.—In this column is deducted the entire area (exclusive of Native States) for which the statistics required for the second and third sections of the table are not forthcoming in whole or in part. This area comprises chiefly estates held in permanent settlement or on privileged tenure, which have not been cadastrally surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, the area in this column is reduced, and that dealt with in sections 2 and 3 correspondingly increased.

Columns 5 and 6.—Column 5 is a check on the accuracy of column 6. In the latter "village papers" means "the papers prepared by the village accountants." They do not in several provinces relate to the whole area included in column 5; for instance, the village returns often do not include the forest areas. In such cases, column 6 must be taken to be the total area for which returns are available, corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts which are calculated from village papers are necessarily somewhat different from those given by the Survey Department, (*a*) because while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas, and (*b*) because the system followed as regards the inclusion or exclusion of areas covered by water, etc., is not uniform in the two sets of returns.

In those provinces (as in Bengal) where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are shewn in columns 2 to 6 of Table A-2.

The year to which the provincial returns relate ends on different dates in different provinces: in Madras, the North-Western Provinces, Oudh, Upper Burma, Lower Burma, Ajmere-Merwara, and Mysore the year ends on 30th June, in Bombay on 31st July, in the Panjab on 30th September, in the Central Provinces on 31st May, and in Bengal, Assam, Berar, Coorg, and Manpur on 31st March.

PROVINCIAL NOTES.

Upper and Lower Burma.

Column 2.—Where there has been no professional survey of the district the best information available is accepted, subject to revision from time to time as surveys extend.

Column 3.—There are no feudatory or tributary states in Lower Burma; in Upper Burma there are six such states, namely, Möngmit, Hkamti Long, Hkamti Singalong, Hsmonghsup,

* The area in village papers has been shewn in the returns of the North-Western Provinces and Oudh and the Panjab since 1884-85 and 1885-86, respectively.

Alegyaung Bardgate, and Padaing Koywa. These are administered by the Deputy Commissioners of the districts in which they are situated.

Column 4.—Includes in the case of Upper Burma certain hill tracts.

Column 2.—In the returns for years prior to 1893-94 the area of the mauzas of the Kámrúp district not cadastrally surveyed was roughly estimated. It has since been correctly ascertained. *Assam.*

Column 4.—Exhibits chiefly the area of wild hill tracts and of tracts permanently settled which possess no agency for the collection of statistics.

A comparatively small area has been cadastrally surveyed, and for this a separate return is prepared by the local Government, which is not reproduced in these tables. *Bengal.*

Columns 2 and 3.—Until 1893-94 inclusive the figures include only a portion of the areas of the Native States in the Orissa and Chota-Nagpur divisions, and exclude altogether the area of Kuch Behar and Hill Tipperah. From 1894-95 Hill Tipperah, Sikkim, Kuch Behar, the tributary states of Orissa, and the tributary states of Chota-Nagpur, have been classed in a separate column (column 3) as feudatory states.

Column 4.—Includes the unsurveyed area of the Angul and Khond Mahals, and certain unreclaimed portions of the Sundarban land in the 24-Parganas district.

In the returns of 1892-93 a large area was shewn as 'area for which no returns exist' against the district of Chittagong. In the following year a portion of this area was shewn under 'forests' and 'net area cropped' (columns 2 and 6) and the rest under columns 3 and 4 of table A-2. Since 1893-94 no entry has been made in the case of Chittagong against column 4 of table A-1.

Column 2.—Includes the area of Native states within the provinces and thus differs from the area in the Administration Report which excludes such area. *N.-W. Provs.*

Column 4.—Includes the area of hill districts which possess no agency for collecting statistics.

Column 2.—Shews the area as given in the settlement records. Previous to 1890-91 the areas of privileged tenures known as jagir and istamrári villages were excluded from this column, while in 1890-91 jagir and minor istamrari areas were included, and from 1891-92 the entire area of the province has been shewn. *Ajmere-Merwara.*

This table was first prepared in its present form in 1891-92.

Column 4.—Represents chiefly the area of unsurveyed tracts and the waste areas (other than forests) not included in village boundaries. *Panjab.*

Column 2.—Shews the area as returned by the local Revenue Survey and Settlement Department, supplemented in the case of Native states by the returns of the Imperial Topographical Survey. It includes, since 1893-94, the estimated area of unsurveyed villages in the Poona district and the area of 47 'hera' jagir villages in the Belgaum district which were excluded from previous returns. The Revenue Survey being incomplete in Sind, the exact area of that province is not known. The column shews the area of surveyed tracts *plus* the estimated area of unsurveyed tracts. *Bombay and Sind.*

Column 4.—Returns are not available for villages which have not come under the operations of the Revenue Survey, and therefore the areas of all unsurveyed villages are excluded by deduction in this column.

Column 5.—Includes, since 1893-94, the unsurveyed portion of the Upper Sind Frontier district into which settlement has been introduced.

Column 6.—The figures of column 5 are repeated because the areas in village papers are derived from the Revenue Survey records.

Column 4.—Includes the unsurveyed areas of zamindari * estates and waste land grants. *Central Provs.*

Column 6.—The area for which accurate statistics are available is in these provinces steadily increasing, and until the survey is complete and re-settlement finished there will always be changes which render comparison difficult.

Column 2.—Shews the area as ascertained by the local Survey and Settlement Department. *Berar.*

Column 4.—The area in this column against the year 1892-93 was the unsurveyed tract of the Melghat taluka which has since come under the operations of the local Survey and Settlement Department.

---

* In the Central Provinces the zamindars are those chiefs of minor importance (or their successors) who, while holding large and compact estates on privileged tenure, have been confined to the rank of ordinary subjects.

Madras.

Column 2.—Shews the area as ascertained by the local Survey and Settlement Department, supplemented, for tracts which have not come under the operations of that Department, by areas calculated from the returns of the Imperial Topographical Survey.

Column 4.—Includes chiefly areas of zamindaris or large proprietary estates permanently settled which have not been cadastrally surveyed and possess no adequate agency for the collection of statistics. The area of these estates comprises roughly one-third of the total area of the British districts of the Presidency. This column also includes (1) the area of the agency tracts in the districts of Ganjam and Vizagapatam, excluding a small subdivision (Chokkapad Kondam) in the former district, and the portion under the control of the Forest Department in the latter; (2) the area of some or all of the whole inam villages in the districts of Ganjam, Vizagapatam, Kistna, Salem, and Trichinopoly (excluding the cultivated portion), and Tanjore; and (3) the area of the Madras town and district in which cultivation accounts are not maintained.

Column 5.—Includes, since 1893-94, the area of wholly inám villages in the North Arcot district.

Column 6.—Excludes, in 1893-94, the unsurveyed lands in the Coimbatore,* Karnul, Kistna, and Madura districts, and the agency tracts of the Godavari district. In later years, the area of unsurveyed lands in all districts has been roughly estimated and included, except in the Godavari district, in which only the portion occupied by forests is included. The agency tracts in Godavari are also included.

Coorg.

Column 6.—The areas in this column are based on the old native bhattis—a measurement the extent of which varied with the quality of the soil,—but 100 bhattis roughly equal 3 acres.

Mysore.

Column 2.—Shews the area ascertained by the Revenue Survey Department.

Column 4.—Exhibits the areas of jodi, kayamgutta, and sarvamanyam villages and jagirs, for which the statistics required for the other tables are not available.

Column 6.—The figures in column 5 are repeated in this column.

TABLE A-2.

The first part of this section deals with the classification of the area shewn in column 6 of section A-1 and gives the proportions (columns 2 and 3) withdrawn from cultivation by inclusion under forests or for some other reason, (4) cultivable land available but not yet taken up, (5) land occupied but not under crop during the year of report, (6) the net area under crop, that is, after deduction of the area cropped more than once in the year. The second part (columns 8 to 13), which was first prescribed in 1884, gives the area irrigated from various sources, to which is added a statement (columns 14 to 18) of the distribution of the said area under various crops.

The headings which have undergone alteration since 1866 are noted below;—

1866 I A-1	1884 A	1891 A-2.
Cultivated	Actually cropped Current fallows	Net area cropped. Current fallows.
Culturable	Available for cultivation	Culturable waste other than fallow.
Unculturable	Not available for cultivation.	Not available for cultivation.
Unappropriated cultivable waste.	Omitted	Omitted.
Communications	Omitted	Omitted.

Lands covered by water, roads, and railroads, which are separately shewn in the form of 1866, are included in the column "not available for cultivation" in the forms of 1884 and 1891.

GENERAL NOTES.

Column 2.—"Forests" means in the returns of 1891 "any land classed or administered as forest under any legal enactment dealing with forests," and in those of 1894, all Government forests and forests administered under any Forest Act. Any cultivated areas which may exist within such forests may be excluded and shewn in column 6 (net area cropped during the year), an explanation being given in a note.

Column 3.—Includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4.—Includes groves not classed in the cropped area.

---

* Except the portions of such tracts for which details of classification are available.

Columns 8 to 13.—Shew the area actually irrigated during the year, areas cropped more than once being counted once only.

Columns 14 to 18.—Shew the gross area of irrigated crops, areas cropped more than once being counted as separate areas for each crop.

PROVINCIAL NOTES.

Upper and Lower Burma.

Column 2.—The area shewn in this column is that given in the Forest Administration Report, and includes reserved forests.

Column 3.—In 'settled' tracts the unculturable area is taken from settlement registers, but in 'unsettled' tracts it is obtained from the best source available.

Column 4.—Includes land thrown out of cultivation and abandoned.

Column 5.—Includes only such land left uncultivated as is actually in possession of cultivators. In Lower Burma such lands are assessed at privileged rates, but in Upper Burma no assessment is levied on land left uncultivated.

Columns 14 to 18.—Include only crops actually irrigated, for instance where an unirrigated crop of sesamum is taken off land which is afterwards irrigated and planted with paddy the area grown with sesamum is not included in this column.

Assam.

Column 2.—In this province "forests" used formerly to include protected and reserved forests. Since 1893-94 reserved forests only have been entered; protected forests, now being included in "unclassed state forests," are not recognised as a special class under the Assam Forest Regulation.

Columns 3 and 4.—In the returns for years prior to 1894-95 separate figures could not be given in these columns for certain districts in which the areas, to which they refer, had not been surveyed.

Column 5.—Includes generally all lands which are thrown out of cultivation or not cultivated, but remain in the occupation of leaseholders. For the hill districts no figures can be given except for tea estates in the Khási and Jaintiá hills and for the plains portion of the Garo Hills district; and in the Surma valley, which is mostly permanently settled, figures are available only for the uncultivated portion of tea estates and of settled estates in the area cadastrally surveyed.

Columns 8 to 18.—There is practically no artificial irrigation. The small area irrigated from hill streams has never been distinguished from other cultivation.

Bengal.

Column 2.—Up to the year 1893-94, the figures in this column shewed Government forests under the administration of the Forest Department and those administered by the Deputy Commissioner of the Sonthal Parganas under Act VII of 1865. The latter were transferred to the Forest Department in November 1894. The subsequent returns represent Government forests only.

Columns 3 and 4.—Include private forests and unclassed state forests.

Columns 8 to 18.—Irrigation statistics are not available except for the area irrigated from Government canals, and hence no irrigation figures are given in the Agricultural Statistics for these provinces.

N.-W. Provs.

Column 6.—The maximum period for which land left untilled is reckoned as fallow is three years.

Columns 8 to 13.—Figures for "Government canals" include those for "private canals," and those for "other sources" included tank irrigation until 1892-93. From 1893-94 separate figures for tank irrigation have been supplied. There are very few private canals in the North-Western Provinces.

Ajmere-Merwara.

Column 2.—The forest area exhibited in the returns previous to 1890-91 relates to khalsa or Government villages only, and that entered in the returns for 1890-91 to khalsa, jagir, and minor istamrari villages.

Manpur.

Column 2.—Includes barren land.

Panjab.

Column 2.—Includes from 1884-85 to 1891-92 all lands specially devoted to forest growth under the control of Government or any local Board or Municipality.

Column 4.—Includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years, but as the change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be kept up from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification of land is annually amended.

Columns 8 to 18.—Shew gross area irrigated, that is, land irrigated in both seasons is counted twice.

Bombay.

Column 2.—Includes land administered by the Forest Department whether formally declared forest under an Act or not.

Column 3.—Includes all land recorded at the Survey and Settlement as unculturable, though at times parts of this land are cultivated.

Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

Column 9.—The figures given for private canals, tanks, wells, and other sources are rough estimates. Previous to 1892-93 figures for private canals were included in "Government canals" and those for tanks and wells in "other sources."

Column 16.—By "miscellaneous food crops" are understood the crops entered in table A-3 as sugar, orchards, garden produce, and miscellaneous food crops.

Central Provs.

Column 3.—Shews areas covered with water, hill, or rock, and land occupied by buildings and roads.

Column 4.—Shews (1) the area and waste within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub jungle or grass, and (4) groves not included in holdings.

Column 5.—Land which has been fallow for a period not exceeding three years is reckoned as current fallow.

Berar.

Column 2.—Includes the forest area administered by the Forest Department.

Column 3.—Includes village sites and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields.

Column 4.—Includes land available for cultivation but not given out; but in the Wun district land given out for cultivation but not cultivated by the occupant was included in the return until 1895, when the error was corrected.

Column 5.—Includes occupied culturable land left fallow for private reasons, such as grazing, rotation, etc.

Madras.

Column 2.—Includes from 1895-96 the area cultivated within forests.

Column 4.—Previous to 1892-93 the entire area of whole inám villages in ryotwari tracts of the Salem district was given in this column.

Column 5.—Includes all occupied waste, that is to say, waste portions of land for which revenue is paid. Before 1893-94 this column included unoccupied lands in whole inám villages in Nellore, which have since been included in columns 3 and 4.

Column 10.—The term "tanks" refers to a particular kind of dammed reservoirs. Previous to 1891-92 the area entered in this column was the gross, not the net, area irrigated, areas cropped more than once being added to the net area.

Coorg.

Columns 8 to 13.—Figures for land partly irrigated from springs and mountain streams are not available.

Mysore.

Column 2.—Shews the areas of state and district forests and of plantations.

Column 3.—Includes not only lands absolutely unfit for cultivation, but also lands reserved for pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 3 to 5 or 6 as the case may be.

Column 4.—Shews unoccupied assessed waste.

Column 5.—There is no system of fallows in this province, that is, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For purposes of account the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is shewn as fallow. The lands occupied and assessed are sometimes unfit for cultivation, having been taken up on full assessment merely for use as pasture; but the exact area of such lands cannot be ascertained, though it cannot be large.

Columns 8 to 18.—Formerly these columns included areas in some districts occupied but not cultivated. The error was rectified in the return for 1893-94.

TABLE A-3.

The third section of table A shews the gross cultivated area under each crop, irrespective of irrigation and double-cropping, the area under the latter

being included in the statement, but subtracted in column 41. The area dealt with is that stated in column 6 of table A-2.

The headings which have undergone alteration since 1866 are :—

1866 III D-P.	1884 B.	1891 A-3.
Other food-grains	Other food-grains, including pulses.	Barley. Cholam or jawar. Cambu or bajra. Ragi or marua. Maize. Gram. Other food-grains, including pulses.
Oilseeds	Oilseeds	Linseed. Til or jinjili. Others.
Sugar	Sugarcane	Sugarcane. Others.
Fibres	Jute Others	Jute. Others.
Vegetables	Omitted	Omitted.
Opium	Ditto	Opium.
	Chinchona	Chinchona.

The following items were added in 1891 :—

Condiments and spices.	Other drugs and narcotics.
Other dyes.	Fodder crops.
Indian hemp.	Orchards and garden produce.

GENERAL NOTES.

In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulæ prescribed by the provincial authorities.

The crops selected for inclusion in columns 10, 14, 18, 21, 26, 33, 37, and 38 are determined by the provincial authorities.

In July 1896 it was ruled that column 41 should exhibit the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops; in such cases the area first sown might be omitted.

Previous to the issue of this rule the practice differed in different provinces: in Madras, Ajmere-Merwara, and Pargana Manpur the figures were for the area sown or placed under crop; in Bombay they were for the area sown, but any area on which the crop failed was treated as unsown; in the North-Western Provinces and Oudh the figures represented the total cultivated area exclusive of the double cropped area and the area on which *kharif* sowings failed; in Bengal, the Panjab, and the Central Provinces the figures represented the area from which crops were taken. The practice was not everywhere uniform: in Assam, Berar, and Mysore, the area sown or placed under crop having been returned by some districts, while in others the figures represented the area from which crops were actually taken. In Coorg neither the area sown nor the area actually cropped was shewn; but all wet land which pays assessment as cropped was entered.

The figures for areas under tea, coffee, and chinchona differ in many instances from those in the special supplementary returns which exhibit detailed figures for these crops, the reason being that the two returns do not cover the same period; the special returns also include areas for which accurate statistics are not available, and which, therefore, are excluded from this table.

PROVINCIAL NOTES.

Upper and Lower Burma.

The table shews the actual area cropped, including the area on which crops have been destroyed, but excluding fallow. Land on which more than one crop has been obtained is shewn as a separate crop area.

Assam.

This table shews only the area under tea cultivation in Cachar and the Khási and Jaintiá hills. In the case of Sylhet the area under crops other than tea is available only for the cadastrally surveyed tracts, and the information was for the first time given in the return for 1893-94. The cropped areas shewn under the five upper districts of the Assam valley relate to the tracts cadastrally surveyed, and to the *khiraj* lands and the tea estates not cadastrally

surveyed. In the case of the Garo and Naga hills districts the areas under different crops are available for the plains tracts only, and were entered for the first time in the return for 1893-94.

Column 36.—Includes area occupied by village sites.

Columns 37 and 38.—For years prior to 1894-95 separate figures were not available for miscellaneous food and non-food crops in the Goalpara, Nowgong, and Lakhimpur districts.

Bengal. As no returns are at present prepared by village or circle officers, the figures entered in this table are only estimates, except those given for the Chittagong district. District officers have not always been able to estimate under heads "orchards and garden produce" and "miscellaneous food and non-food crops;" and the figures are, therefore, incomplete.

N.-W. Provs. and Oudh. In these provinces the area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crop by the village accountant. The areas of important mixed crops, namely, wheat and barley, wheat and gram, barley and gram, jowar and arhar, bajra and arhar, and cotton and arhar, for which separate headings are provided in the crop returns, were included until 1893-94 with "other food grains including pulses." Since 1894-95 they have been distributed in accordance with prescribed formulæ and entered under the crops of which they are composed. In the Almora district no statistics of crops other than tea are available for 1895-96.

Ajmere-Merwara. The cropped area entered in the returns previous to 1890-91 related to khalsa or Government villages only, and that entered in the return for 1890-91 to khalsa, jagir, and minor istamrari villages. The whole of the cropped area in the province has been entered since 1891-92.

Bombay. *Column 36.*—Includes green fodder for cattle.

Central Provs. *Column 36.*—Includes groves situated within the home farm of the landlord or the holding of a tenant.

Berar. *Column 40.*—No figures for double-cropped areas were available previous to 1894-95.

Madras. *Column 10.*—Includes all miscellaneous food-crops which elsewhere are entered in column 37.

Column 31.—The figures differ considerably from those in the special supplementary return of chinchona cultivation, the reason being that many planters do not furnish information required for the special return.

Column 35.—Shews the areas sown with grass and crops raised solely for purposes of fodder. Lands left waste for grazing purposes and on which grass grows spontaneously are not included in this column.

Coorg. *Column 31.*—There are no separate chinchona plantations in Coorg, the plant being grown with the coffee in coffee estates. The area entered is therefore an estimate of that actually occupied by chinchona.

Mysore. *Column 37.*—Shews the area on which crops are sown and not the area from which crops are taken.

TABLE A-4.

This table deals with agricultural stock. The headings of the form now in use differ from those of 1866 and 1884 in the following respects:—

1866 III D-2.	1884 III D-2.	1891 A-4.
Cows and bullocks	Cows and bullocks	Bulls and bullocks. Cows.
.....	Buffaloes	Male buffaloes. Cow buffaloes.
.....	.....	Young stock (calves and buffalo calves).
Horses Ponies	Horses and ponies	Horses and ponies.
Donkeys	Mules and donkeys	Mules and donkeys.
Sheep and goats	Sheep and goats	Sheep. Goats.
.....	.....	Camels.

GENERAL NOTES.

The figures given in this return are believed to be on the whole less accurate than those contained in the other returns of agricultural statistics. In some provinces they include, and in others they exclude, animals in towns, cities, and cantonments.

In August 1896 it was ruled that live stock in cities and cantonments should be included in the returns wherever it is possible to secure their enumeration, and that oxen and buffaloes not old enough for work or to produce young should be treated as "young stock."

The headings prescribed in 1891 were not fully adopted until 1891-92, when all the provinces furnishing the figures, except the Panjab, Assam, and Berar, supplied them in the prescribed form; in 1892-93 the returns of these provinces also were made uniform with the rest.

PROVINCIAL NOTES.

Upper and Lower Burma.

The figures of live stock in Lower and Upper Burma are collected by thugyis or headmen when preparing the capitation tax rolls, or when required for the return. Cattle are not counted on any particular day. The figures include all animals in towns and also those employed in each district by Government departments such as Transport, Military, Police, and by Municipalities. "Young stock" includes all animals up to three years of age.

Assam.

Stock statistics for the six Assam valley districts were received for the first time in 1890-91, and for all the districts, except Cachar and the Khási and Jaintiá hills, in 1893-94. The figures entered under the Naga hills relate only to settled land in the Barpathar and Eastern Rengma mauzas. It has not yet been found possible to obtain any statistics of stock for the Khási and Jaintiá hills, and, for the Garo hills, no such statistics have been received for 1895-96.

Figures of live stock are collected each year shortly before the time when the return is submitted by the district officers. The necessary information is collected in the manner prescribed in Circular No. 18, dated the 27th April 1894, by the mandals and tabulated for each mandal's circle, after which the figures are totalled for each mauza and tahsil, and then for the district. The stock in towns, cities, and cantonments are included, except in two or three districts.

No age has been fixed below which cattle are classed as young stock. In some districts calves below three years are so classed; in some the age limit is below one or two years, and in others calves not weaned are shewn as young stock.

Bengal.

Live stock statistics are not collected at present, except from the tracts where surveys are being made or a record of rights prepared.

N.-W. Provs. and Oudh.

The figures of live stock are obtained by an annual census made by the patwari at the time he makes his round for the record of the spring crops. A rough record of the detail for each tenant is made by the patwari and tested from time to time by the kanungo. The resultant totals are preserved in the patwari papers. The figures do not include, as a rule, the stock in cities, large towns, and cantonments. There are, however, some cantonments in which patwaris' papers are kept and for which stock statistics are returned. No age has been fixed below which cattle are classed as young stock.

Ajmere-Merwara.

The return does not include stock in towns and cantonments. Calves under three years of age are classed as young stock.

No general system for the enumeration of cattle obtains in this province. In some villages a census is taken, but there is no fixed date for it, while in others the figures are collected from the registers of mortality maintained from information supplied by lambardars and patels and checked by the police.

Manpur.

An annual census of live stock is taken on the 15th March.

Punjab.

The return is based on figures furnished by patwaris. These officials make an enumeration of the cattle in a village every fourth year when a detailed jamabandi is prepared. The enumeration is not made on a particular day, but whenever the patwari finds time to do so. The result is that in a fourth of the province an enumeration of cattle is made every year, and the fresh figures for that fourth part are incorporated in the annual return by subtracting from the preceding year's figures the old statistics and adding the new figures.

Cantonments do not form part of any patwari circle: therefore the return excludes stock in cantonments, except those in Peshawar and Lahore, where special arrangements have been made with cantonment authorities for the figures. Cattle in the Hissar farm are not included, as that area is not within any patwari circle. Cattle in smaller towns and large cities are included, excepting those in the cities of Delhi, Dera Ghazi Khan,

Ambala, Montgomery, and in the towns of Kangra and Multan. Orders have been issued to secure the figures for cattle in all cantonments and municipalities.

Cattle up to two years of age are classed as young stock.

Ploughs are considered to mean "ploughs at work," that is, ploughs provided with a yoke of plough oxen.

The figures entered in the general table exclude Sind, for which province no statistics of live stock have yet been collected, though endeavours have been made to obtain particulars. The difficulties attending the enumeration are numerous, and the returns supplied are unsatisfactory. The Commissioner is taking steps to remedy the deficiencies.

Bombay.

The figures of live stock are annually collected by village officers at a house to house enquiry in June, in the manner directed in village form 13 of the Revenue Manual. The figures are regularly tested by circle inspectors (kanungos). Stock statistics are not collected in the city of Bombay. Figures for the towns of Ahmadabad and Surat were returned for the first time in 1890-91. No age has been fixed below which cattle are classed as young stock. The young of cows and buffaloes not old enough for work or to produce young, are classed as young stock.

Columns 10 and 11.—In 1891-92 arrangements were made for the registration of mules, donkeys, and camels in all districts. Formerly statistics were collected only from districts where these animals were numerous.

Central Provs.

No stock statistics were received from these provinces until after 1891-92, and those furnished in 1892-93 related to thirteen districts only. In 1893-94 no statistics were collected for the Mandla district, and those given for the Balaghat district relate to seventy-three patwari circles only. The figures are collected annually (no particular date fixed) by the patwaris for the areas in their charge, in the form of appendices to the *milan khasra*. The total of the return is recorded in the tahsil by the kanungo in a village register. In some districts stock in towns and cities are included, in others they are not. Cantonments are not included within any patwari circle, and therefore no figures are returned from them.

Young oxen, if actually on work, are classed under the head "bulls and bullocks." Heifers which have not reached the usual calving age are excluded from the class "cows."

Berar.

A census of the cattle in each district is taken once a year, though not on any particular date, by the village officials, and the figures are checked by munsarims and tahsildars. Table A-4 is based on the results of that census, and include, in the case of the Akola district, cattle in towns and cantonments. Calves under two years are classed as young stock.

Madras.

Statistics for whole inám villages in all districts, except Nellore and Salem, were for the first time included in the return for 1893-94, but the figures are not very accurate. Statistics for whole inám villages in Nellore have been included since 1894-95. Previous to 1884 it was the practice in Madras to take a stock census every five years. A census of cattle in Government villages is now taken annually through the agency of village officers and checked by superior revenue officers: this is done in the last week of October in most districts and in the first week of May in others. The results are entered in a special statement (form 21, Section II of the Manual of Village Accounts) maintained in each village, and are thence tabulated for each taluk and district. In inám villages, however, no suitable agency is available for the work, and Collectors obtain information for these villages as best they can: it is not known to what extent any census is made in them. No information exists regarding live stock in permanently-settled estates.

The figures in the return down to 1894-95 did not include live stock in the town of Madura and in one cantonment of Ganjam. Instructions were subsequently issued to the Collectors of these districts to enumerate the stock and include the figures in the return. The live stock in a portion of Trichinopoly town not forming part of any village is excluded, no village agency being available, but arrangements have been made with the municipality to obtain the information.

The table includes stock statistics of all towns and cantonments except those in zamindaris, and those which do not form part of any revenue village and in which the statistics are not collected because there is no agency for the purpose.

Column 6.—Cattle under four years of age are classed as young stock.

Coorg.

No census of live stock is taken on any particular day. The parapattigars at the time of the yearly jamabandi ascertain from the village headmen and ryots the number of cattle possessed by each ryot, and enter the particulars in each ryot's account, a copy of which is sent to the Commissioner's office. European planters are also called on to furnish every year a return of cattle in their estates. The table is compiled from all the information so derived.

Animals in municipal towns are included. Calves under three years of age are classed as young stock.

Mysore.

No census of live stock is taken, but the statistics are collected every year by the shanbog and patel of each village by enquiry or inspection just before the taluk jamabandi, and recorded in the village account on which this table is based.

TABLE C.

This table indicates the relation between area, population, and land revenue, or in other words, it exhibits the mean burden of the State assessment on the land assessed to it and on the community at large. It was first prescribed in 1884, and was revised in 1893. Similar information previous to 1884 is to be found in Tables ID, IE-2, and 1-E-6, appended to the General Administration Reports.

The two main classes of tenure, (1) ryotwari and (2) zamindari and village communities, specified in 1884, were not exhaustive, and the provincial administrations were allowed to make additions to these two classes in accordance with local requirements. The general table now shews all tenures under one or other of three heads, namely (1) ryotwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled).

The present form differs from that prescribed in 1884 in the following respects :—

1884.	1893.
Column 1.—(1) Ryotwari . . . (2) Zamindari and village communities.	(1) Ryotwari. (2) Zamindari and village communities (temporarily settled). (3) Zamindari (permanently settled).
Column 3.—Deduct area not fully assessed, including estates assessed at privileged rates	Deduct (*a*) Area not fully assessed. (*b*) Area for which returns required for this table are not available.
Column 4.—Balance of area fully assessed	Balance, that is fully assessed area for which returns are available. (*a*) Total. (*b*) Cultivated.

GENERAL NOTES.

The instructions appended to the form of 1884 prescribed that in column 1 the ryotwari area of Bombay, Madras, and Assam should be distinguished from the other areas of those provinces ; that a similar distinction should be made between the zamindari and khalsa areas of the Central Provinces, and between the zamindari and Government estates of Bengal; that column 2 should be column 2 of Form A1, less column 3 of that form; that small revenue-free plots for which details were not forthcoming need not be included in column 3, and that columns 11 and 12 might be left blank if the information was not obtainable.

In July 1893 these instructions were somewhat modified and the following rules were prescribed :—

Column 1.—The varieties of tenure shewn should be included, as far as possible, under one or other of the following, namely (1) ryotwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled).

Column 3 (a).—Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population (column 11). In the Madras, Bombay, and Berar returns all land on which a full assessment has not been leviable during the year (for instance, assessed unoccupied land) should be classed for the purposes of this column as "area not fully assessed." Areas should not be entered in this column merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons.

Column 4.—This column should be subdivided into 4(*a*) total fully assessed area for which returns are available, and 4(*b*) area cultivated out of the area given in column 4 (*a*). The latter column should be equal to the former after deducting current fallows and fully assessed waste.

Column 5.—Where the land revenue includes the zamindar's share, the net demand should be entered, and the return should shew the payments due by the zamindars to Government, not those due by ryots to the zamindars. The actual realisable demand for the year should be entered, after excluding arrears for past years. Sums remitted on account of unoccupied lands, short crops, etc., should be excluded. Land revenue in this column includes miscellaneous land revenue.

Column 8.—As in column 5, but miscellaneous land revenue and land revenue on areas not fully assessed to be excluded.

Column 9.—To be column 8, divided by column 4(*a*).

Column 10.—To be column 8, divided by column 4(*b*).

Areas under forest are included in column 2 under the prevailing tenure of the province.

The population in column 6 is that of the last general census.

PROVINCIAL NOTES.

Upper Burma.

Column 3 (a).—The only areas in Upper Burma classed as zamindari are special grants made on the terms given in Appendix I of the Rules under the Upper Burma Land and Revenue Regulation.

Column 3 (b).—Includes non-State lands which are at present assessed in the form of thathameda (house-tax).

Column 4.—Shews only assessed State lands.

Column 5.—Includes thathameda (house-tax), water-rate, revenue from State land, and miscellaneous land revenue, but excludes remissions under these heads.

Column 8.—Shews only the land revenue demand realised on the fully assessed area entered in column 4.

Column 10.—The cultivated area referred to in this column is the total assessed area entered in column 4, as fallows in Upper Burma are not assessed. The incidences given in columns 9 and 10 are therefore the same.

Column 11.—The population of villages and kwins is considered as belonging to fully or not fully assessed area accordingly as the greater portion of the village or kwin lands are or are not fully assessed.

Lower Burma.

Column 1.—Before 1893-94 all grants made under the waste land rules were classed as zamindari (temporarily settled); since that year grants under the waste land rules of Arakan (1839-41), and Pegu (1865), are classed as zamindari (temporarily settled), while grants under Lord Canning's rules (1863) are classed as zamindari (permanently settled). All other land is classed as ryotwari.

Column 3 (a).—Excludes settled circles in which temporary reductions of maximum rates of assessments have been sanctioned, but includes the areas (described in the note to column 1) assessed at privileged rates.

Column 3 (b).—Includes all areas other than those assessed either fully or not fully.

Column 4 (a).—Includes current fallows.

Column 4 (b).—Excludes current fallows.

Column 5.—Shews the actual demand on the land assessed, including miscellaneous land revenue, but excludes remissions granted.

Column 8.—Shews the actual demand on the land assessed, excluding miscellaneous land revenue and remissions granted.

Assam.

Column 1.—Waste land grants held on progressive assessment are now included under the head "zamindari (temporarily settled)," but previous to 1892-93 such grants were shown under a separate head, except in 1890-91, in which year these as well as Government wastes and forests were included under the head "zamindari and village communities." In the returns for 1893-94 and subsequent years forest area has been included under ryotwari tenure.

Column 5.—Prior to 1893-94 the entire revenue of the Garo hills district, that is, the portion paid to zamindars as well as the Government share in it, was shewn in this column. Since that year only the Government share of the revenue has been shewn.

Column 6.—Includes the population of the feudatory states in the Khási and Jaintiá hills.

Column 10.—The incidence has not hitherto been calculated on the same principle each year. For instance, in 1886-87, 1887-88, and 1890-91 the calculation was based on the actually cropped area shewn in column 5 of table A-3 and the revenue shewn in column 8 of table C. In 1888-89 and 1889-90 the incidence in some districts was returned at the same figure as in column 9. Since 1893-94 uniformity has been maintained in this respect, the incidence being calculated on the cultivated portion of the fully assessed area. The cultivated area in the zamindari permanently settled estates in Sylhet and Goalpára not being known, the rates of incidence cannot be given for these estates.

Bengal.

The table is prepared once in five years for this province, the greater part of which is permanently settled. The figures for 1892-93 have therefore been reproduced in the return for 1893-94.

Column 1.—The classification of estates adopted in the returns hitherto published has been (1) zamindari and (2) Government estates; but in future the following revised classification will be adopted :—

(1) *Zamindar (permanently settled).*—Includes estates managed for proprietors by Government.

(2) *Zamindari (temporarily settled).*—Includes (*a*) all temporarily settled estates, namely, those settled for periods with proprietors, and private estates leased to farmers for periods; and (*b*) all estates owned by Government as proprietor.

Column 2.—Shews the area of estates borne on the revenue roll of the district, whether wholly situated within the district boundaries or not, and does not include lands of estates partly situated within the district boundaries but borne on the revenue roll of another district. This accounts for the discrepancy between the district areas shewn in this column and those shewn in table A-1.

The area to be shewn in this column will, in future, agree with the area shewn in table A-1. It will represent the total area by survey less the area of Feudatory states.

Columns 3 (a) and 3 (b).—Excludes small revenue-free plots, for which details are not forthcoming. *N.-W. Provs. and Oudh.*

Column 4 (b).—Shews the net cropped area of the year corresponding with that in column 37 of table A-3 (area under crops), but limited to the fully assessed area for which returns are available of column 4(*a*).

Column 6.—The total population against the North-Western Provinces excludes the population of the family domains of the Maharaja of Benares in the Benares and Mirzapur districts

Column 10.—The cultivated area referred to in this column is the cropped portion of the fully assessed area, but previous to 1892-93 it included current fallows.

Column 11.—Includes population of revenue-free lands. The inclusion does not materially affect the incidence shown in column 12.

No figures have been entered in columns 8 to 13 opposite "Lucknow, permanently settled," as no portion of the permanently-settled area has been fully assessed to land revenue.

Columns 13 and 14.—The figures are taken from the latest available census report.

Column 1.—From 1886-87 to 1889-90 the khalsa (revenue-paying) area was classed as "zamindari and village communities" and from 1890-91 to 1892-93 as "ryotwari." From 1890-91 to 1892-93 jagir and minor istamrári areas, and from 1891-92 large istamrári areas were classed as zamindari. Since 1893-94 the khalsa area has been classed as "zamindari and village communities (temporarily settled)" and the jagir and istamrári areas as "zamindari (permanently settled)". *Ajmere-Merwara.*

Column 2.—The area entered from 1886-87 to 1889-90 related to khalsa land only, and that entered in 1890-91 included jagir and minor istamrári villages. Since 1892-93 the entire area of the province has been entered.

Columns 3(a) and 3(b).—Jagir villages have been entered as deductions in these columns since 1890-91.

Column 4.—Includes in the case of the khalsa villages the assessed cultivated area including assessed fallows. The minor istamrári area was entered as not fully assessed in 1890-91 and 1891-92, and the large istamrári area was entered as such in 1891-92. The whole of the istamrári area, which is now returned as "zamindari (permanently settled)," has been entered as fully assessed since 1892-93.

Column 8.—The return for 1890-91 included the land revenue of minor istamrári villages, and for 1891-92 and 1892-93 the revenue of both large and minor istamrári villages.

Column 10.—The cultivated area referred to in this column is, in the case of "zamindari (temporarily settled)," the cropped portion of the fully assessed area.

Column 11.—Excludes population of jagir villages, but the population of such villages was included in the returns for 1890-91 and 1891-92. The population of large istamrári villages was excluded from the returns for 1890-91, but included in the subsequent returns.

Column 6.—Includes since 1893-94 the population of jagir villages which was previously omitted. *Manpur.*

Column 11.—Excludes population of jagir villages.

Columns 3 (a) and 3 (b).—Include villages receiving frontier remissions, tracts which are entirely unassessed (such as the Kulu mountains) and istamrári tenures. *Panjab.*

Column 5.—Includes assigned revenue.

Column 10.—The cultivated area referred to in this column in the return for 1892-93 and former years included current fallows, except in certain districts in the south-west of the province, mostly under fluctuating assessment. The cultivated area taken for calculating the incidence since 1893-94 is exclusive of current fallows.

Column 3(a).—Includes fallows from 1892-93 and fully assessed unoccupied area from 1893-94. Formerly these were included in column 4. *Sind.*

Column 4.—Excludes fallows and the fully assessed unoccupied area (see note to column 3(*a*)). In Sind fallows are assessed once in five years.

Column 5.—Includes revenue from alienated area.

Column 8.—The assessment on the fully assessed unoccupied area, which was previously included in this column, has been excluded from 1893-94, and that on fallows has not been entered from 1891-92.

Column 10.—The incidence is calculated from the cultivated area, excluding fallows, and the assessment on that area.

Column 1.—Lands held under special tenures, such as (1) talukdari, mehwasi, udhad-jamabandi, narvadari, and bhagdari in Gujrat, and khoti and izafat in the Konkan, which *Bombay.*

were shown under separate heads in the previous returns, have been classed as "zamindari and village communities (temporarily settled)" in the returns from 1892-93.

Column 3(a).—Includes alienated area and the area held free of revenue or the revenue of which has been reduced by special agreement, and the fully assessed unoccupied area since 1893-94.

Column 3(b).—Includes land not available for cultivation or unassessed.

Column 4.—Includes land under temporary cultivation; also pôt inâms paying full assessment. The fully assessed unoccupied area, which was formerly included in this column, has been deducted in column 3(*a*) since 1893-94.

The same figure (fully assessed occupied area) was returned both for columns 4(*a*) and 4(*b*) in 1894-95. But in the returns for 1895-96 the figure entered in column 4(*b*) represents the net cropped area.

Column 5.—Shews net receipts on account of the land, including quit-rent and miscellaneous land revenue. In the case of Sind the total land revenue in column 5 includes consolidated land and water assessment levied on lands irrigated from canals. (See note to column 8.)

Column 8.—The assessment on the fully assessed unoccupied area, which was previously included in this column, has been excluded since 1893-94.

In the returns for 1895-96, the remissions on account of short crops, etc., which have hitherto been included in columns 5 and 8, are excluded from each of these columns.

Column 10.—The incidence is calculated from the occupied area, which, in the Presidency Proper, is treated as the cultivated area for the purposes of this table, and the assessment on that area.

Column 11.—Includes population of pôt inâms and the like scattered areas which cannot be distinguished from the population of the fully assessed area. The population of the fully assessed portion of zamindari estates has been included since 1893-94.

Column 12.—The incidence is based on the figures given in column 11 and those in column 8, *plus* the amount of full assessment on privileged lands held in fully assessed villages at less than that assessment. Previous to 1893-94 miscellaneous land revenue was included in the calculation.

Central Provs.

Column 1.—Previous to 1890-91 the entire area of the province was classed as khalsa or zamindari.

Column 2.—Exhibits the area by village papers (column 4 of table A-1) *plus* the area for which no returns exist (column 2 (*b*) of the same table). Previous to 1890-91 it shewed the area entered in column 1 of table A-1, less Feudatory and Tributary states.

Column 3 (a).—Zamindari estates properly so-called (that is, excluding malguzari) are classed as not fully assessed, but in the returns for 1889-90 and 1890-91 they were classed partly as fully assessed and partly as not fully assessed, and previous to 1889-90 the entire area of such estates was exhibited as fully assessed.

Column 10.—The cultivated area referred to in this column includes fallows. Since 1894-95 the net cropped fully assessed area has been taken in calculating the incidence.

Berar.

Column 2.—The figures for 1891-92 and 1893-94 are the area according to village papers; those for 1892-93 are the area according to professional survey.

Column 3 (a).—This column shews jagir, izara, and palampat villages, all unassessed land, forest areas, village sites, roads, rivers, etc., but it has not hitherto been filled up uniformly in all districts: in some the entire area of the district *minus* the occupied and unoccupied areas of khalsa villages has been included, in some the unoccupied area of villages settled under waste land rules has been excluded, while in others the whole of the occupied and unoccupied area of the district has been excluded.

Column 4.—Includes land assessed but not occupied during the year, and potkhrab land.

Column 5.—The survey assessment of jagir villages is included in the Akola district, while in the Basim district the quit-rent of such villages appears to be taken.

Column 8.—Includes assessment on unoccupied land, but, like column 3 (*a*), this column does not represent the same statistical facts for all districts in the returns for previous years.

Column 10.—The incidence has not hitherto been calculated on the same method each year. For instance, in 1884-85 and 1890-91 to 1892-93 the incidence was based on the actually cropped area and the assessment on the occupied and unoccupied area, and in 1885-86 and 1888-89, it was calculated on the assessed occupied area and the assessment thereon; while in 1886-87, 1887-88, and 1889-90 the calculation was based on the assessed occupied and unoccupied area and the assessment thereon. The incidence since 1893-94 has been calculated on the net cropped area entered in column 5 of table A-2.

Column 11.—Excludes population of jagir and izára villages.

Madras.

Column 3(a).—In the case of ryotwari tracts this column shews the area of unoccupied assessed lands, of minor inâm lands in Government villages held rent-free or subject to quit-rent, and of all unassessed poramboke and forest lands excluding portions of the first mentioned two classes occupied under "miscellaneous;" and in the case of zamindari tracts the areas of hills, porambokes, and minor inâms are shewn. The entire area of whole inâm villages is deducted in this column.

Column 3(b).—Ryotwari; includes the area of Agency tracts, except in Godavari for which district particulars for such tracts are reported by the Collector.

Column 4.—Ryotwari; shews the total occupied area.

Column 5.—Ryotwari; shews the net land revenue demand, excluding remissions and deductions, but including quit-rent on minor ináms and miscellaneous revenue pertaining to land, and also water-tax.

In the case of zamindari and wholly inám villages, this column shews *peshkash* or quit-rent payable to Government, together with water-rate on lands included in such tracts, as also jodi or quit-rent on minor ináms situated therein.

Column 8.—Ryotwari; shews the net land revenue demand, excluding remissions and deductions and revenue from minor ináms (quit-rent and water-tax). In the case of zamindari this column shews *peshkash* or quit-rent payable to Government, excluding the jodi or quit-rent and water-rate on minor ináms.

In the returns for the year 1892-93 and for the previous years, the figures in column 8 against ryotwari are in some districts greater than those in column 5. This is due to the fact that the entry in column 5 included quit-rent on minor ináms, water-rate, and other miscellaneous land revenue; while column 8 shewed the assessment on the fully assessed area, both occupied and unoccupied. Where the fully assessed unoccupied area is large, or the miscellaneous revenue included in column 5 is small, the revenue in column 8 is generally in excess of that in column 5.

Column 10.—The cultivated area referred to in this column is in the case of ryotwari lands the total area cropped out of the area given in column 4(*a*). The corresponding information is not available for the zamindari area. Previous to 1893-94 the occupied area was for the purpose of this return taken as equivalent to the cultivated area.

Column 11.—Shows the entire population of ryotwari and zamindari villages, respectively, except of ryotwari agency tracts in Ganjam and Vizagapatam.

Coorg.

Column 3.—Includes bané and cardamom lands.

Mysore.

Column 3 (a).—Shews the area entered in column 4 of table A-1 and in column 4 of table A-2.

Column 3 (b).—Shews the areas entered in columns 2 and 3 of table A-2.

Column 4 (a).—Shews Government occupied lands including minor ináms in Government villages (columns 5 and 6 of table A-2).

Column 4 (b).—Shews the actually cropped area (column 6 of table A-2).

Column 5.—Exhibits the total realisable land revenue including miscellaneous land revenue.

Column 8.—Shews the total ryotwari demand "*plus*" the quit-rent due on minor inams in Government villages.

TABLE D.

This table shews the principal varieties of tenure held direct from Government. Owing to the great diversity of tenures the form is not perfectly adapted to the conditions existing in every province, but it was thought desirable to prescribe a form for general adoption in order to admit of the compilation of an abstract for the whole of India to complete the series of consolidated tables embodied in the Agricultural Statistics. The classification finally selected in 1891 was therefore of the most general description possible, but the difficulties experienced in some provinces in moulding their statistics to the prescribed classification have not yet been wholly surmounted, and so far it has not been possible to compile a consolidated return for all India.

For the years previous to 1884-85, in which year the collection of Agricultural Statistics for British India was first published, information regarding the varieties of tenure held direct from Government is to be found in table I.-E.-3 appended to the General Administration Reports. The form was suggested by the Statistical Committee of 1866, was revised in 1884, and again revised in 1891.

The modifications introduced in the form since 1866 are noted below:—

1866. I.-E.-3. COLUMN 1.	1884. I.-E.3. COLUMN 1.	1891. D. COLUMN 1.
1. Great zamindaris paying more than R50,000 revenue. { Held by individuals under law of primogeniture. / Held by individuals and families under ordinary law.	1. No alteration.	1. Revenue payers paying more than R50,000 revenue. { (*a*) Individuals under law of primogeniture. / (*b*) Individuals and families under ordinary law. / (*c*) Village communities.

1866. I.-E.-3.	1884. I.-E.-3.	1891. D.
COLUMN 1.	COLUMN 1.	COLUMN 1.
2. Large zamindaris paying more than ₹5,000 revenue. — Under law of primogeniture. — Under ordinary law.	2. Large zamindaris paying from ₹50,000 to ₹5,000 revenue. — Under law of primogeniture. — Under ordinary law.	2. Revenue payers paying from ₹50,000 to ₹5,000 revenue. — (a) Individuals under law of primogeniture. (b) Individuals and families under ordinary law. (c) Village communities.
3. Small zamindaris other than those of cultivating communities.	3. Zamindaris paying from ₹5,000 to ₹100 revenue.	3. Revenue payers paying from ₹5,000 to ₹100 revenue. — (a) Individuals under law of primogeniture. (b) Individuals and families under ordinary law. (c) Village communities.
4. Proprietary cultivating communities paying in common.	4. Small zamindaris other than those of cultivating communities paying less than ₹100 revenue.	4. Revenue payers paying less than ₹100 revenue. — (a) Individuals under law of primogeniture. (b) Individuals and families under ordinary law. (c) Village communities.
5. Proprietary cultivators paying separately, including all small estates paying less than ₹100.	5. Peasant proprietors paying separately.	5. Peasant proprietors paying separately.
6. Holders of revenue-free tenures. — In perpetuity. — For life.	6. Holders of wholly or partly revenue-free tenures. — In perpetuity. — For life or lives.	6. Holders of wholly or partly revenue-free tenures. — In perpetuity. — For life or lives
COLUMN 8.	COLUMN 8.	COLUMN 8.
Revenue rate per acre.	Revenue rate per acre.	Omitted.
COLUMN 9.	COLUMN 9.	COLUMN 9.
Supposed net profit per acre.	Omitted.	Omitted.

GENERAL NOTES.

Class 5.—(Peasant proprietors paying separately.) This class is intended to represent the occupants of ryotwari lands only.

Class 6.—(Holders of wholly or partly revenue-free tenures). Includes inámdars and jagirdars. The local Governments are at liberty to subdivide the minor head "in perpetuity" of this class so as to distinguish between grants (*a*) absolutely and (*b*) conditionally held in perpetuity.

Side head 1 (number of estates).—The number of estates entered in this column represents the number of separate estates recorded on the Land Revenue Registers.

Side head 2 (number of villages).—A village is often entered more than once in this column when it contains or consists of parts of two or more estates separately assessed.

Side head 3 (number of holders or shareholders).—One proprietor holding land in two or more villages is entered twice or oftener, according to the number of settlements made with him.

The totalling of the return has been abandoned since 1891-92 as misleading, owing to the double entries in certain side heads, such as side head 2, in which a village is often entered more than once.

In March 1892 the words "other than those of cultivating communities" were omitted from the fourth class of tenure (revenue-payers paying less than ₹100 revenue) in the form prescribed in 1891, in order to admit of such communities being classed under the heading "village communities" in this class.

PROVINCIAL NOTES.

Upper Burma.

In the case of the Shwebo district, tenants of State lands and owners of bobabaing land who paid water-rate, were classed as "individuals under law of primogeniture" in 1891-92, whereas in 1892-93 and subsequent years they have been classed as "individuals and families under ordinary law."

Holders of State land are classed as "peasant proprietors paying separately." Previous to 1895-96 holders of non-State land were classed as "holders of wholly or partially revenue-free tenures," the ordinary non-State land tenure being included under the sub-head "in perpetuity." In 1895-96 all tenures were classed as "peasant proprietors paying separately."

Lower Burma.

With the following exceptions all tenures in Lower Burma are classed as "peasant proprietors paying separately":—

(*a*) Grants under the old waste land rules of Pegu and Arakan, which are classed as "holders of wholly or partially revenue-free tenures."

(*b*) Grants under Lord Canning's rules, which are classed as "purchasers of waste lands."

Assam.

Classes 1 to 4 refer to permanently-settled estates only. All entries under these classes come under the sub-head "individuals and families under the ordinary law," as there are, as at present ascertained, no individuals holding under the law of primogeniture, and no village communities, properly so called, in the province.

Class 5 (peasant proprietors paying separately) does not include ryotwari area in a permanently settled tract.

Class 6 (holders of wholly or partly revenue-free tenures) includes holders of *lakhiraj* and *nisfkhiraj* estates, special tenures, and revenue-free estates.

Class 7 (landowners who have redeemed the revenue) includes holders of commuted estates and fee-simple grants compelled to redeem.

Side head 2 (number of villages).—Shews collectively the number of villages taken from the last census report, as the number comprised in each class is not at present known.

Side head 3 (number of holders or shareholders).—Cannot be filled up, as the number of shareholders in an estate is not usually known. It is not the custom in any part of Assam (except, perhaps, in Cachar) for all the shareholders to register their names.

Bengal.

This table is prepared triennially, as the variations in the entries from year to year are very slight. The figures for 1892-93 and 1894-95 have therefore been reproduced.

Class 9 (others) includes Government estates under direct management, and also estates of recusant proprietors under the management of Government. The description of tenures included in this class will in future be shewn in full detail.

Side head 2 (number of villages).—Shews in one sum the number of villages as returned by the Revenue Survey.

Side head 3.—(Number of holders or shareholders) is, for the purposes of classes 1 to 4, 6, 7, and 8, taken as equivalent to "proprietors registered in the Collectorate."

N.-W. Provs. and Oudh.

The word "estate" means a property separately assessed to land revenue.

Up to 1894-95 forest land, State properties, Government grants, nazul, petty grantees, areas of civil lines and cantonments, and Government appropriations, were entered against class 9 (others); they have since been excluded from the table.

Class 5 (peasant proprietors paying separately).—There are no ryotwari lands in the North-Western Provinces and Oudh. The figures for 1891-92 to 1893-94 are apparently incorrect.

Side head 1 (number of estates).—An estate paying a certain amount of revenue, but situated in three parganas of the district and shewn in the land revenue registers as three separate estates, each under that amount of revenue, is treated as one estate and not three estates.

Side head 2 (number of villages).—The number of villages is not necessarily the actual number of mauzas in the district held from Government. Thus a village containing part of two or more mahals paying different sums as revenue is shewn twice or thrice as necessary.

Side head 6 (average assessment of each estate).—The figures are obtained by dividing the gross revenue by the number of estates. The gross revenue is the gross land revenue for each description of tenure. In the case of revenue-free tenures, or where the revenue is not ascertainable, the estimated revenue obtained for the purpose of assessing the 10 per cent cess is taken. In 1895 the Government of India directed that the *actual*, not the assumed, revenue should be shewn in column 7 against class 6 (holders of wholly or partially revenue-free tenures). The figures for 1894-95 were rendered in accordance with this instruction.

The divisions of tenures prescribed by the Government of India in 1884 were not adopted for Oudh until after 1889-90.

Ajmere-Merwara.

The return was first prepared in 1890-91.

Class 5 (peasant proprietors paying separately) includes all ryotwari holdings.

Class 9 (others): the figures for 1894-95 represent khalsa land. Instructions have since been issued to place such land under the head "revenue payers."

Panjab.

The return is prepared quadrennially. The revision of statistics is not, however, relegated to a single year, but is gradually carried out in one village one year and in another the next during the whole period of four years.

Side head 1 (number of estates).—About 90 per cent of the villages come into the third class of tenure. Class 9 (others) includes lands held on leases from Government without right of ownership.

Side head 1 (number of estates), *2* (number of villages), *5* (gross area), and *6* (average assessment of each estate).—In the case of class 6 (holders of wholly or partly revenue-free tenures) these heads cannot be filled up unless only whole estates which are partially or entirely assigned or released are shewn as revenue-free holdings, and all smaller holdings are omitted. The figures for this class are necessarily included in the total for classes 1 to 4 so long as class 6 is not made to consist exclusively of entire estates, for classes 1 to 4 and 9 now include every estate in the province.

Side head 3 (number of holders or shareholders).—The number of holders entered against class 6 is the number of revenue assignees.

The prescribed form was not adopted until the year 1891-92. Before that year (the return for 1884-85 excepted) the return was prepared in a form prescribed by the Panjab Government to suit local requirements.

Bombay. The prescribed classification of tenures has been adopted in the returns for 1895-96.

Under class 9 (others) the figures for 1894-95 represent unsurveyed Government villages not included in any of the specified tenures entered in the return.

Side head 1 (number of estates).—As regards peasant proprietors (class 1 in the Bombay form) the word "estate" means (as in Madras) the "holding." So with respect to pôt inams in khalsa villages, each alienated holding is classed as an estate. But in the case of entirely alienated villages the entire village is classed as one estate.

Side head 4 (gross area).—As regards ryotwari area the total is for occupied land only. The area of other estates is given in the gross, and includes unculturable and unoccupied land.

Central Provs. Previous to 1891-92 the Bhandara and Balaghat zamindaris were classed as "individuals under law of primogeniture," and small plot properties, known as málikmakbuza holdings, were included in the malguzari area and classed as "individuals and families under ordinary law" and "village communities." The former are now classed as "individuals and families under ordinary law," as they are not held under special *sanads*, and the latter as "peasant proprietors paying separately." Class 9 (others) includes lands excluded from Government forests and held on lease.

Berar. In the Wun district izara and palampat villages are entered under classes 3 and 4, sub-head 'village communities,' while in the Basim district palampatdars are entered under class 7 (landholders who have redeemed the revenue) and izardars under class 8 (purchasers of waste lands).

Class 5 (peasant proprietors paying separately) shews the occupants of survey numbers.

Side head 1 (number of estates).—The number of estates in the Akola district is the number of survey numbers, each number being considered a separate estate; while in the Wun district each khatadar's holding is entered as an estate.

Side head 4 (gross area).—Shews the occupied area.

Madras. This table is prepared quinquennially, the variations in the entries from year to year not being great. The table prepared for 1891-92 has therefore been reproduced since that year.

Zamindaris, mittas, palayams, etc., are included in the first four classes of tenure; all ryotwari holdings are included in class 5 (peasant proprietors paying separately); ináms, shotriems, etc., are included in class 6 (holders of wholly or partially revenue-free tenure); insáms as well as ryotwari lands on which the quit-rent has been redeemed are included in class 7 (landowners who have redeemed the revenue); renters of estates in the Vizagapatam district, and leaseholders of gold mines in the Nilgiri district are included in class 9 (others).

Side head 4 (gross area).—Includes waste and poramboke lands in the case of zamindaris, mittas, and wholly inám villages, and represents the total area included in *patta* in the case of ryotwari.

Side head 6 (average assessment of each estate).—Shews, in the case of zamindaris, inám, and shotriems, the average *peshkash* or quit-rent and water-tax payable to Government, and in the case of ryotwari the average assessment on ryot's holding, including water-tax and charge of second crop. The assessment represents the gross demand, inclusive of remissions, and deductions.

Coorg. *Class 6* (holders of wholly or partly revenue-free tenures,) includes the jamma umbli and jagir holdings.

Class 8 (purchasers of waste lands) includes coffee estates paying assessment.

Side head 2 (number of villages).—Shews the number of villages collectively, not detailed under each class of estate.

Side head 4 (gross area).—Excludes bané, fallow, and cardamom lands. The area given in this column is approximate, the survey of all holdings not having been completed.

Mysore. Some of the ryotwari lands have hitherto been entered under the first four classes of tenure and some under class 5 (peasant proprietors paying separately). Since 1893-94 class 5 shews all ryotwari holdings and class 6 (holders of wholly or partly revenue-free tenure) all ináms (minor and whole villages).

TABLE E.

The object of this table is to shew the number of voluntary and compulsory transfers of ownership of land or tenant-right, and the area so transferred. By voluntary transfers are meant transfers made by actual contract or gift, transfers by inheritance not being taken into account.

The form now in use was prescribed in July 1891. It differs from the form prescribed in 1884, and that suggested by the Statistical Committee of 1866, in the following respects :—

1866 I.-E.-5.	1884 I.-E.-5.	1891 E.
Nature of tenure.	*Nature of tenure.*	*Nature of tenure.*
Great zamindaris, complete.		
Shares in such zamindaris, complete.		
Large zamindaris.		
Shares in such zamindaris.		
Small zamindaris.		
Shares in such zamindaris.		
Villages owned by cultivating communities.	Proprietors. Revenue-paying.	Revenue-paying.
Shares in villages owned by cultivating communities.	Proprietors. Revenue-free.	Wholly or partially revenue-free.
Holdings of proprietary cultivators.		
Intermediate holdings of a transferable character.	Tenants who have statutory (or otherwise recognised) powers of transfers.	No alteration.
Holdings of ryots at fixed rates.		
Holdings of ryots with right of occupancy.		
Revenue-free tenures.		
Number of transfers recorded.	*Number of transfers.*	
(*a*) By voluntary sale or gift.	(*a*) By private contract or gift.	
(*b*) By compulsory sale.	(*b*) By order of court.	
(*c*) By inheritance.	Omitted.	
Average area in acres of each holding transferred.	*Total area transferred.*	No alteration.
(*a*) By voluntary sale.	(*a*) By private contract or gift.	
(*b*) By compulsory sale.	(*b*) By order of court.	
(*c*) By inheritance.	Omitted.	

GENERAL NOTES.

It is optional with local Governments to enter or omit transfers of lands held by tenants.

Instructions were issued in 1891 to the authorities of the Panjab and Central Provinces to the effect that the entries under "by order of Court" should shew not merely the transfers occasioned by debt, but all forms of transfer effected through the medium of a Court.

In August 1896 the following rules were prescribed :—

(1) Changes of entry due to succession, partitions, or simple mortgages, are not really transfers, and should be excluded from the table, as also should redemptions of mortgage ;

(2) All temporary transfers such as leases should also be excluded, but mortgage with possession should be treated as a transfer and entered in the table ;

(3) All transfers made by order of a Court should also be included in the table.

The word "Court" in the entry "by order of Court" should be held to include a Revenue Court.

PROVINCIAL NOTES.

Upper and Lower Burma.

Transfers of property in inland are not at present registered in Upper Burma ; the information is collected by township officers. The return includes cases in which land has been permanently transferred by succession, partition, gift, sale, or other transaction, for value consideration.

In the Sagaing district, transfers by private contract or gift were not included in the returns for 1891-92 and former years.

The column "by order of a Court" does not include transfers by order of a revenue Court.

Assam.

Columns 12 to 21 exclude the areas transferred in the Sylhet and Goalpara districts, the information not being available. Transfers by inheritance and non-permanent transfers, such as leases or usufructuary mortgages, are excluded in some districts, but in most districts all kinds of transfers are entered, including transfers by inheritance. In four districts the column "by order of Court" includes transfers by order of a revenue court, while in three districts it does not. The number of such transfers is, however, insignificant. This column also includes all kinds of cases in which transfer is made by order of a Court (for instance, cases of disputed succession).

Bengal.

The return is not prepared, the necessary information not being available.

N.-W. P. and Oudh.

The return relates to cases of sale of revenue-paying or revenue-free land only. Transfers by inheritance or non-permanent transfers, such as leases, usufructuary mortgages for short periods, are excluded.

Statistics of transfers of tenant-right are not given. Transfers by gift have not hitherto been entered, as the information was not available.

Under the heading 'by order of Court' are included merely those transfers which are the result of debt incurred by the judgment-debtor. In some districts this heading includes transfers for arrears of revenue, in others they do not.

Column 5, revenue-paying.—Figures of the Fyzabad and Partabgarh districts for 1893-94 are incomplete, the information for some of the parganas, which are under settlement, not being available.

Column 10, revenue-paying.—Figures for the Fyzabad and Barabanki districts for 1893-94 are incomplete, the information for some of the parganas not being available.

Ajmere-Merwara.

The first return received from this province was for 1887-88. The return shews all kinds of transfers, including those by inheritance, and temporary transfers, such as leases or usufructuary mortgages. The column "by order of Court" includes transfers occasioned by debt incurred by judgment-debtors, and all kinds of transfers effected by order of Court. It also includes transfers by order of a revenue court and by order of a civil court.

Manpur (Central India).

Transfers of property in land are not permitted in Manpur.

Panjab.

The return is prepared in a form prescribed by the Local Government, as the form prescribed by the Government of India is not applicable to the Panjab. Before 1895-96, statistics for the different kinds of tenure were given collectively, figures for each kind not having been available. The return includes all kinds of transfers relating to the tenant-rights of proprietors and occupancy tenants, but excludes transfers by inheritance. The transfers included in the return are, (1) partitions, (2) gifts and exchanges, (3) mortgages with possession, (4) redemption of mortgages, (5) sales and permanent transfers for value, (6) other transfers, which last includes cases of a miscellaneous nature such as enhancement of rent, errors corrected, etc. There are few cases of transfers for arrears of revenue, but if they do occur they are included under "by order of Court." In Rohtak, Montgomery, and Gurdaspur such transfers are at present excluded. From 1895-96 the return includes only transfers by mortgage and sale.

Bombay.

The return is not prepared. The question of registration of transfers has been under the consideration of the Bombay Government; and the return will probably be prepared next year.

Central Provs.

Transfers of tenant-right have been included in the return since 1892-93. The figure against "proprietors" are filled up from returns compiled on the basis of mutation proceedings. Those against "tenants" are based on returns furnished by patwaris under Revenue Book Circular I-67, which directs that all transfers should be entered, excluding transfers by inheritance, but including transfers by mortgage with possession as well as transfers by sale. Instructions have also been given to include in columns 2 and 4 all transfers based on an order of Court, whether effected in execution of a money decree or resulting from mortgage or from a disputed succession case, and in columns 7—11 and 17—21 all transfers effected

privately with the exception of transfers by inheritance. The return does not include leases or mortgages without possession.

The words "by order of Court" are held to include transfers by order of a revenue court, for instance, for arrears of revenue, but such transfers are very rare in these provinces.

Berar.

In Akola, Ellichpur, and Básim the return does not contain all kinds of transfers including those by inheritance: in Básim such transfers are placed under "by private contract or gift"; in Akola transfers of registered occupancy of fields, made under settlement rule IX, are included; in Ellichpur non-permanent transfers, such as leases, are included, while in Akola and Básim they are excluded.

In Ellichpur, Básim, and Wun "by order of Court" includes all kinds of transfers effected by a court; in Akola, Buldána, and Amráoti it does not; transfers occasioned by debt incurred by the judgment-debtor are included in all districts (Amráoti excepted).

In Buldána, Amráoti, and Ellichpur "by order of Court" includes "by order of a revenue court," for instance, for arrears of revenue, while in Akola and Wun they do not.

Madras.

Transfers by inheritance, or non-permanent transfers, such as leases, mortgages, etc., are not included. Only permanent transfers, as by sale or gift, are included, when the parties concerned apply for and obtain transfers of revenue registry. These are entered under "private contract or gift." Probably transfers due to partitions were up to 1895-96 included under "private contract or gift." Under the heading "by order of Court" are included all changes of registry under decrees of civil courts, whether the decrees were passed on disputes regarding title or by reason of debts incurred by judgment-debtors. Also cases in which lands are sold for arrears of revenue due to Government are included if such lands are purchased by private parties, but excluded if purchased by Government.

Transfers of tenant-right are not entered, the information not being available.

The entry under the head "revenue-paying" includes ryotwari holdings paying full assessment, and permanently settled estates paying *peshkash*; while that under the head "wholly or partially revenue-free" relates to minor ináms and whole inám villages.

Coorg.

The return includes all legal transfers of property (*a*) by voluntary action of the owners, (*b*) by virtue of decrees of civil and orders of revenue courts, (*c*) those accrued by succession, except temporary transfers, such as leases or usufructuary mortgages for short periods.

Transfers ordered by Courts in cases of disputed succession, and those occasioned by debt incurred by the judgment-debtors, are included under the heading 'by order of Court.' This heading also includes transfers ordered by civil courts from registered holders to decree-holders of lands sold by civil courts in satisfaction of decrees, and of holdings sold for arrears of revenue by the revenue authorities.

NOTE.—The excess over the total area irrigated (column 13) of the total area of crops irrigated (column 18), which is shewn in most cases, is due to the inclusion in column 18 of the area irrigated at both harvests.

(a) There is but little irrigation in Assam.

(b) Figures not available, except for columns 2, 3 to 5, 6 and 7.

(c) Included in "Other sources."

(d) Includes 52,100 and 50,550 acres respectively irrigated in large Istamrar villages in Ajmere, of which details are not available.

TABLE A-2—*contd.*

(a) Does not agree with the total obtained by adding up the details, as it includes the cropped area in the Nágá Hills (1,233 acres) and Garo Hills (21,723 acres), of which details are not available.

(b) Differs from the area in column 6 of Table A-2. No explanation received.

(c) The total cropped area of the province does not correspond with the total of columns 40 and 41, owing to the details of crop statistics not being available for the Almora and Garhwál districts.

(a) Differs from the area in column 6 of Table A-2. No explanation received.

(b) Differs from the area in column 6 of Table A-2 by 15,965 acres which is the cropped area in the inam villages of the North Arcot and Trichinopoly districts, the details of which are not available and are therefore not included in this table.

(c) See note under Assam on page 93.

(d) The total cropped area does not correspond with the total of columns 40 and 41 [see Note (c)] under the North-Western Provinces on page 93.

(e) Differs from the figure in column 6 of Table A-2 : no explanation received.

(*a*) Details of the areas under crops of Almora and Garhwál are not available, except those of tea.

(*b*) The areas under mixed crops which were hitherto included under "Other food grains" were eliminated and their component parts shewn under the principal crops. The acreage under pure crops has therefore increased, while that under "Other food-grains" has decreased.

of the PROVINCES and MYSORE, from 1891-92 to 1895-96.

(*a*) This district was formed in 1893-94, out of parts of the Bassein and Thôngwa districts.
(*b*) Part of the Thayetmyo district was transferred to Upper Burma in 1893-94.
(*c*) In 1895-96 this district was partitioned between Thatôn, Toungoo, and Pegu.
(*d*) A new district.

(1) NOTE.—The sum of the area in col. 4 (*b*) plus the area not fully assessed agrees with that shown under head 37 of Table A3, except in the case of Garhwál in which the fully assessed area according to the revised settlement is shown.

(2) The nature of tenure in Oudh is all zamindari.

** The land revenue assessment necessarily differs from the land revenue collections which include collections on account of former balances and exclude so much of the assessment as has not been collected during the year.

in each DISTRICT in each of the PROVINCES and MYSORE in 1895-96.

PROVINCES AND OUDH.

Land revenue assessed per head of population (cols. 5 and 6).	Land revenue assessed on fully assessed area [col. 4 (*a*)].	Incidence per acre of land revenue (col. 8) on fully assessed area (col. 4).		Population of fully assessed area.	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11).	Towns of over 10,000 inhabitants.		District and Nature of Tenure.	
		For total area.	For cultivated area.			Number of towns.	Aggregate population.

(a) No figures.

(b) The leaf in Burma is converted into *letpet*, pickled tea, which is eaten by the Burmans. Hence the "manufactured" (that is, pickled) leaf in that province weighs more than uncured leaf.

(c) Estimated.

NOTE.—This table is a reproduction in compressed form of the forecasts annually received from the local authorities. The figures in columns 2 and 3 represent the acreage and outturn of the year opposite which each figure is placed. The figures in columns 3 and 8 represent the acreage and outturn, as finally ascertained, of the year preceding the year opposite which the figures in columns 2 and 7 are placed. The figures in columns 4 and 9 represent the average acreage and outturn of a series of years previous to the year opposite which the figures are placed.

It should be noted that the figures for Native States are in most cases defective by the omission of States, or by errors, and must be accepted with reserve.

(a) Eight years.
(b) Six years.

TABLE I—*continued.*

ESTIMATED AREA and YIELD of certain principal CROPS in each of the PROVINCES and in the NATIVE STATES from 1892-93 to 1896-97.

Provinces.	Area in acres, 000's omitted.					Yield in tons, 000's omitted.				
	Of current year's crop.	Of previous year's crop.	Average of preceding years.	Percentage by which column 2 exceeds (+) or falls short of (−) area in		Estimated yield of current year, that is, of area in column 2.	Yield of previous year, that is, of area in column 3.	Average of preceding years.	Percentage by which column 7 exceeds (+) or falls short of (−) outturn in

(*a*) Three years.
(*b*) Figures for 1892-93 included in 'Rest of India.' The figures for 1893-94 are defective.
(*c*) Excluding the figures for Gwalior, Baghelkhand, Bhopal, Indore, Bundelkhand, and Goona, from which no returns have been received.
(*d*) Figures for 1892-93 and 1893-94 included in 'Rest of India.'
(*e*) Four years.
(*f*) Includes figures for Central India and Hyderabad.
(*g*) Includes approximate figures for Hyderabad and a portion of Central India, also for Madras, Mysore, and Assam, in which the wheat area is unimportant. From 1894-95 figures for all the states in Central India and for Hyderabad have been shewn separately and those for Madras and Assam discontinued.
(*h*) Mysore only.
(*i*) Exclusive of Central India for which figures are not available.
(*j*) In calculating these percentages, the figures for Central India have not been taken into account.

* The land revenue assessment necessarily differs from the land revenue collections which include collections on account of former balances and exclude so much of the assessment as has not been collected during the year.

POPULATION in each DISTRICT of JAIPUR in 1894-95 and 1895-96.

Land revenue assessed on fully assessed area (col. 4).	Incidence of land revenue (col. 8) on fully assessed area (col. 4) per acre.		Population of fully assessed area.	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11).	Towns over 10,000 inhabitants.		Districts and Nature of Tenure.
	For total area.	For cultivated area only.			Number of Towns.	Aggregate population.
